

Livinagro

What is LIVINGAGRO?

The LIVINGAGRO project aims to share innovations related to agroforestry with stakeholders working with olives and grazed woodlands in four Mediterranean countries: Italy, Greece, Lebanon and Jordan. The project funded by the European Union (EU) will help stakeholders to increase profitability, sustainability, and biodiversity in the face of limited resources and environmental constraints.

What is AGROFORESTRY?

Agroforestry is the practice of deliberately integrating woody vegetation (trees or shrubs) with crop and/or animal systems. Agroforestry can offer you valuable benefits.
